

{iaps} {iaps} {iaps}

International Association of Physics Students

IAPS is a completely **student-run association** for **physics students and student societies** from around the world, which has been working to promote peaceful collaboration among the **international community** of physics students since 1987.

Activities:

- Networking, executive subcommittees, journal of the IAPS (jIAPS), ...
- **Yearly events:** International Conference of Physics Students (ICPS), Physics League Across Numerous Countries for Kick-ass Students (PLANCKS), Annual General Meeting (AGM)
- **Special events:** affordable professional excursions (CERN, Gran Sasso, iaps4fusion, Lights of Tuscany, ...), outreach activities (School Day, IAPS Light Grant, ...)
- **Grants:** article contests, ICPS Worldwide Grant, IAPS Member Action Programme (IMAP), ...

We're open to cooperation!

Contact us at: ec@iaps.info

International Conference of Physics Students 2015;
Zagreb, Croatia.

IYL by the IAPS:

To contribute to the celebrations of the **International Year of Light (IYL)**, members of the **International Association of Physics Students (IAPS)** had planned and organized various **professional and outreach activities**.

In an effort to support these activities, the IAPS had presented the **Light Grant**, used to financially aid the realisation of these projects.

The National Committee Italy organized the **Lights of Tuscany**, a 4-day event that brought together several dozen international physics

IYL activities by the National Committee Germany.

students, and allowed them to participate in a light-themed scientific programme, including a **LightTALK**, excursions to scientific institutions, as well as lectures by accomplished physicists researching light.

The members of the IAPS organised a second **Light-TALK**, at the **International Conference of Physics Students** in Croatia.

The most significant of the activities was **IAPS School Day**, when physics students from around the globe organized outreach events, workshops and excursions held with the goal of introducing schoolchildren to the science of light.
