## Lasers in Medicine and Life Sciences

---

Advanced summer school for undergraduate and postgraduate students of medicine and physics

12<sup>th</sup> — 21<sup>st</sup> July 2017

### 1. Invitation

The city of Szeged is proud to have been chosen as the site of one of the four pillars of a massive European laser project entitled **ELI (Extreme Light Infrastructure)**. The construction of **ELI-ALPS (Attosecond Light Pulse Source)**, a facility dedicated to ultra-short laser pulses, has entered its final stretch. Apart from breaking new ground in the study of very fast atomic and molecular processes, it is also expected to bring about improvements in medicine and life sciences. It is now the fourth time the University of Szeged has organised the summer school entitled **Lasers in Medicine and Life Sciences (LAMELIS)** with the aim of discussing and disseminating the implications of these developments. Encouraged by the feedback we have received on the quality of the talks and the atmosphere of the previous events, we are committed to maintaining

the tradition, so we announce LAMELIS again this year. **The LAMELIS 2017 summer school will be held between 12<sup>th</sup> and 21<sup>st</sup> July.**

The summer school is open to both medical students and physics students. Although the theoretical depth of talks is tailored for medical students, the programme can also benefit physics students as they can learn of medical applications of lasers directly from distinguished experts of the field and receive first-hand information on the current status of ELI-ALPS.

### 2. Speakers

- Ferenc Bari (University of Szeged, HU)
- Elke Beyreuther (Helmholtz-Zentrum, DE)
- Tomáš Čížmár (University of Dundee, UK)
- Katalin Hideghéty (University of Szeged, HU)
- Petar Lambrev (Biological Research Centre, Szeged, HU)
- Péter Maróti (University of Szeged, HU)
- Justin Molloy (MRC National Institute for Medical Research, UK)

- Jörg Pawelke (Technische Universität Dresden, DE)
- Adrian Podoleanu (University of Kent, UK)

Other speakers are being contacted.

### 3. Seminars and laboratory visits

We also offer seminars in the fundamentals of optics and laser physics, and you will have the chance to gain hands-on experience with lasers in research laboratories and clinical facilities.

### 4. The city of Szeged

Szeged is the third largest city of Hungary and the regional centre of the Southern Great Plains. It is divided in two by the river Tisza. The name Szeged was first mentioned in a royal charter of 1183. It might have come from Hungarian 'szeg' (angle), referring to the corner the river Tisza makes with its tributary, the Maros, whilst some say it can be traced back to an archaic sense of 'szeg', meaning 'dark blond', and it refers to the colour of the water where the Maros joins the Tisza. The current cityscape was formed by the reconstruction following the great flood of 1879, which killed 165 people and destroyed about 5 600 buildings. An emblematic building of the city, the Votive Church, was erected in memory of the flood, and the sections of the outer boulevard bear the names of the cities that contributed to the rebuilding of Szeged: Rome, Brussels, Berlin, Paris, London and Moscow.

A city of 170 000, Szeged is a teeming cultural and intellectual centre with a student population of 25 000, many of whom are international students of medicine, giving the city a touch of multiculturalism. Still, it remains a quiet, human-sized, liveable and loveable city, whose atmosphere is created by the Tisza, by extensive green spaces and by enchanting statues. Boasting an average of 2 000 sunshine hours a year, Szeged has earned the moniker 'the City of Sunshine'. In addition to its theatre and symphonic orchestra, in the summer Szeged also hosts the Open Air Festival, the history of which goes back more than 80 years. The Hungarian festival season concludes with the Szeged Youth Days (SZIN) each year since 2003.

### 5. The University of Szeged

The University of Szeged was established in 1921 with the relocation of the University of Kolozsvár (Cluj-Napoca) founded in 1872. Since then, it has grown to be one of the most prestigious universities in Hungary, ranked as number one amongst Hungarian universities and in the top 300 in the world in three consecutive years (2003, 2004 and 2005). It is now organised into 12 faculties, which provide education for 25 000 students and employ more than 6 000 people, 1 000 of which are teachers.

Alongside internationally noted contributions to mathematics, information technology, physical and material sciences, the University is also noted for its strong focus on life sciences, augmented by close ties to the Biological Research Centre of the Hungarian Academy of Sciences. The most significant accomplishment under the auspices of the University of Szeged so far has been the discovery of vitamin C and the exploration of the citric acid cycle, made by Albert Szent-Györgyi and rewarded with a Nobel Prize in 1937.

### 6. Practical information and fees

#### Admission criteria

The programme is open to a maximum of 45 undergraduate or postgraduate students in the fields of medicine or physics. If necessary, selection will be made considering the students' motivation, English level and previous research experience, if any.

#### Application

Please download the pdf application form from [www.lamelis.eu/appform/ApplicationForm.pdf](http://www.lamelis.eu/appform/ApplicationForm.pdf) and send it to [lamelis@med.u-szeged.hu](mailto:lamelis@med.u-szeged.hu).

**Application deadline: 10<sup>th</sup> May 2017.**

Fee: 200€. This fee includes tuition, accommodation, lunches, scheduled excursions and extracurricular activities. We do not cover the costs of passports, visas, health insurance, travel to and from Hungary and other personal expenses.

### 7. Further information

Department of Medical Physics and Informatics  
University of Szeged, Faculty of Medicine – Faculty of Sciences

Korányi fasor 9, H-6720, Szeged, Hungary  
Postal address: H-6701 Szeged, PO box 427, Hungary
